

MARINE OIL ANALYSIS

NRVIA* CERTIFIED INSPECTORS NOW OFFER MARINE OIL ANALYSIS

Our affiliate, JG Lubricant Services, understands the importance of **marine equipment reliability** and they work everyday with the Marine Service industry to properly access marine engines, transmissions, steering pods and generators. Oil analysis allows a whole new level of diagnostics to evaluate oil condition and internal part wear. Their ISO 17025 certified laboratories offer highly sensitive testing to enable a complete evaluation of marine oils. You'll receive detailed reports that list test results and feature an Overall Severity Rating with easy to understand comments and recommendations.

Oil Analysis allows you to:

- **Get the most from your marine oils while protecting and maintaining the seaworthiness of your marine components**
- **Detect potential "issues" before they become problems or failures**
- **Reduce warranty risk exposure and increase resale value**
